EDUCATION

İSTANBUL TİCARET UNIVERSITY – İstanbul, Türkiye

Oct 2021 – Jun 2026

Bachelor of Engineering, Computer Engineering

WORK EXPERIENCE

Software Persona – Ataşehir, İstanbul, Türkiye

Jan 2026 – Feb 2026

Software Developer Intern

- Completed an intensive mobile development program involving UI/UX design (Figma), JavaScript, and SQL.
- Built mobile applications in a structured workflow; integrated AI-assisted tools to accelerate prototyping.
- Reference:** Awarded Internship Success Certificate for excellence in project delivery and technical adaptation.

Nabusoft Digital Solutions – Levent, İstanbul, Türkiye

Jul 2024 – Aug 2024

Software Developer Intern

- Developed and tested Android mobile applications and games; presented final products to technical leads.
- Leveraged AI tools (ChatGPT, Gemini) to increase efficiency in code generation, debugging, and documentation.
- Reference:** Received official Internship Completion & Success Certificate upon successful project evaluation.

PROJECTS

Instagram Clone | Swift (iOS), Java (Android), Firebase

2026

- Developed separate native photo-sharing applications for both iOS and Android platforms.
- Built platform-specific UIs using **Storyboard** (iOS) and XML layouts (Android) for native experience.
- Integrated **Firebase** and **Core Data** for real-time authentication and cloud synchronization across both versions.

Foursquare Clone | Swift (iOS), Parse Server

2026

- Engineered a native location-based social app featuring venue check-ins and map integration via **Parse Server**.

Currency Exchange App | Swift, SwiftUI, iOS, Fixer API

2026

- Built a real-time converter with **SwiftUI** consuming REST APIs for live currency rate updates.

Mobile Games (Survivor Bird & Catch Kenny) | LibGDX, SpriteKit, Java, Swift

2025

- Developed separate native game versions; utilized **SpriteKit** for iOS and **LibGDX** framework for Android.
- Implemented physics engines and collision detection uniquely for each platform to optimize performance.
- Engineered "Catch Kenny" reflex game using native animation libraries for both iOS and Android platforms.

Cloud-Integrated Notepad | Swift (iOS), Java/Kotlin (Android), Google Cloud

2024

- Developed separate native notepad applications featuring **Google Maps API** for location-based note-taking.
- Managed secure cloud synchronization and data persistence using Firebase and Google Cloud on both platforms.

The projects listed above are representative examples of my work; I am actively developing new applications. Source code for these and other ongoing projects can be found on my GitHub profile.

SKILLS & CERTIFICATIONS

- Languages:** English (B2 - Upper Intermediate), Turkish (Native).
- Programming:** Swift (iOS), Java, Kotlin, SQL, JavaScript.
- Frameworks & Engines:** SwiftUI, Storyboard, UIKit, Core Data, Android SDK, Jetpack, LibGDX, SpriteKit, Firebase, Parse Server.
- Hardware & Systems:** Assembly (x86/8086), Computer Architecture (8086), Microprocessors, Digital Logic Design, Memory Management.
- AI-Assisted Development:** ChatGPT & Claude (Xcode agents), Gemini (Android Studio & VS agents).
- Tools & IDEs:** Xcode, Android Studio, Visual Studio, Git, Figma.
- Certifications:** Software Persona & Nabusoft Internship Success Certificates · Project Writing Training (LinkedIn) · Software Management (Beykoz) · KOSGEB Entrepreneurship · Udemy iOS & Android Development.
